

SANJAI B

AI Developer

✉ sanjaib0522@gmail.com  linkedin.com/in/sanjaib2207  sanjai-base.github.io/portfolio-website ☎ 7904074396 📍 Chennai, Tamil Nadu

CAREER SUMMARY

Passionate AI Developer with hands-on experience in building AI-powered applications and automation workflows using Python, AI tools, and modern development practices. Skilled in problem-solving, logical reasoning, debugging, and developing real-world AI solutions including NLP, computer vision, and intelligent assistant systems. Quick learner with a practical mindset, strong adaptability, and eagerness to contribute to AI-assisted software development and workflow automation.

SKILLS

Programming & Development — Python, JavaScript, REST APIs, Backend Development, Application Debugging, Feature Implementation

AI-Assisted Development — ChatGPT, Claude, Gemini, AI Workflow Automation, Prompt-Based Development, AI Productivity Tools

AI & Machine Learning — NLP, Computer Vision, Deep Learning, AI Model Integration, Intelligent Automation, Real-Time AI Applications

Software Engineering — Testing, Validation, Quality Checks, System Behavior Analysis, Problem Solving, Workflow Optimization

Tools & Technologies — Flask, FastAPI, OpenCV, Git, GitHub, API Integration, Database Fundamentals

Professional Skills — Logical Reasoning, Communication, Adaptability, Team Collaboration, Execution Focus, Continuous Learning

PROJECTS

AI-Powered Violence Detection System Using CCTV Surveillance - (Final Year Project)

- Developed an AI-powered surveillance system using Python, OpenCV, and deep learning models for real-time activity detection and monitoring.
- Implemented intelligent automation workflows for threat detection, alert generation, and system response handling.
- Integrated APIs, location-based services, and real-time processing features to improve application functionality and workflow efficiency.
- Optimized system performance through debugging, testing, validation, and iterative model improvement techniques.
- Utilized AI-assisted development tools and workflow optimization techniques to enhance system functionality and execution efficiency.

AI-First CRM HCP Module — Log Interaction Screen

- Developed an AI-powered CRM application using React, FastAPI, and PostgreSQL for intelligent workflow management.
- Implemented AI-assisted conversational workflows, interaction tracking, and automated response handling features.
- Integrated APIs and backend services for real-time data synchronization and application functionality.
- Improved workflow efficiency and application reliability through debugging, testing, and feature optimization.
- Worked closely with development workflows to implement feature enhancements, testing processes, and backend optimizations.

Docsify - Based Document Summarization & Visual Explanation Platform

- Developed an NLP-based document summarization application using Python and AI-assisted workflows for intelligent text processing.
- Implemented text preprocessing, keyword extraction, and semantic analysis techniques for structured summary generation.
- Built backend workflows and integrated APIs for document handling, automation, and application functionality.
- Improved application accuracy and performance through testing, debugging, and workflow optimization techniques.
- Supported application enhancement by implementing AI-assisted debugging, testing, and feature validation workflows.

Jarvis AI Bot – An Intelligent Python-Based Virtual Voice Assistant

- Built an intelligent AI voice assistant using Python, Speech Recognition, and NLP techniques for real-time conversational interactions.
- Developed automation workflows for voice commands, task execution, and AI-driven response generation.
- Integrated web search, system utilities, and intelligent processing modules for enhanced user interaction.
- Enhanced application performance through debugging, modular development, testing, and workflow optimization.
- Applied logical reasoning and modular development approaches to improve conversational workflow accuracy and response handling.

INTERNSHIPS

AI Intern-Centre for Apple Technologies, Rajalakshmi Institute of Technology

07/2024 – 08/2024

- Developed AI-based applications using Python and modern AI-assisted development workflows for real-world automation tasks.
- Assisted in implementing NLP, machine learning, and intelligent processing features for AI-powered applications.
- Performed debugging, testing, validation, and workflow optimization to improve application performance and accuracy.
- Collaborated with development teams to understand requirements, implement features, and adapt to new technologies and tools.

chennai

Data Analytics-CreatiVerse

08/2024 – 09/2024

Executed Python data analytics projects using Pandas, NumPy, and Matplotlib. Applied mathematics and statistics to generate insights from structured datasets and communicated findings to the team.

chennai

Java Full Stack-Qspiders

01/2026 – Present

Developed full-stack Java applications using Core & Advanced Java (JDBC, Servlets, JSP); executed test cases, reported bugs, and followed agile practices in sprint-based development.

chennai

EDUCATION

St. Joseph college of engineering

2022 – 2026

B.Tech Artificial intelligence and data science (CGPA - 8.49)

Nirmala Metric Hr. Sec. School

2021 – 2022

HSC - 75%

CERTIFICATIONS

- Imarticus Learning: Full Stack Development - Node.JS
- CreatiVerse: Data analytics in python
- LinkedIn Learning: Master class artificial intelligence tools
- Arttifai Tech: Python programming
